

FORAGE SOLUTIONS^{LLC}

HYDRATION HAY[®]

Horse Hay Block

ORIGINAL

premium forage

Absorbs 5X its weight in water!

Hydration Hay[®] Original Horse Hay Block is a premium blend of quality grass and alfalfa hay that has been compressed into a convenient, lightweight block. Simply drop the block into a bucket of water and it will quickly absorb water to make moist, palatable hay. Recommended for all horses at all life stages.

FEATURES & BENEFITS

Dropped in water

Promotes Water Intake for Proper Hydration

The stress of travel can cause many horses to struggle with proper water intake when on the road. With Hydration Hay[®] Horse Hay Blocks, your horse can receive consistent, quality forage and proper hydration at the same time.

Soaked for 5 minutes

Convenient, Lightweight and Easy to Use

Each block only weighs about 2 pounds, so they are easy to carry, feed and travel with. The blocks are compressed, so they take up less room in your truck or trailer.

Ready in 10 minutes

Quickly Absorbs Five Quarts of Water

The patented compression and hydration process allows each block to soak up five quarts of water to make moist, palatable hay.

Compressed Blend of Premium Grass and Alfalfa Hay

Contains consistent, quality grass and alfalfa hay that provide the nutritious roughage horses need.

Reduces the Need to Haul Water and Large Bales of Hay When Traveling

Most horses prefer the taste of their water from home. But Hydration Hay[®] Horse Hay Blocks mask the "odd" taste of foreign water sources, so you can use local water when on the road. No more hauling large, heavy bales of hay and water from home!

Hydration Hay[®] Soak Technology

After numerous scientific formulations, trials and refinements, you now have a way to deliver consistent, quality nutrition in a lightweight, convenient and easy-to-feed compressed block horses just love.

Convenient Way to Deliver Oral Medications and Supplements

The moist hay is a great way to get oral medications, dewormers and supplements into your horse. Please consult your veterinarian before administering medications.

premium forage

FEEDING DIRECTIONS

Hydration Hay® Horse Hay Blocks can be fed dry or soaked in water.

Soaking directions:

Place one 2-lb Hydration Hay® Horse Hay Block in a large bucket. Add a minimum of 5 quarts of water. Allow product to absorb water prior to feeding (approximately 10 minutes). To facilitate more uniform absorption, flip the hay block halfway through soaking time. Additional mixing by hand may further accelerate water absorption.

Designed to replace a portion or all of the forage in a horse's diet. Replace forage on a 1:1 ratio. Each 2 lbs of dry hay can be replaced with one 2-lb dry Forage Solutions LLC Hydration Hay® Horse Hay Blocks.

If replacing all forage in a horse's diet, be sure to feed at a minimum rate of 1.0 to 1.2% of body weight (10-12 lbs/ 5-6 blocks for a 1,000 lb horse) with 2.0% of body weight preferred. Inadequate amounts of forage may lead to colic and other digestive disturbances.

INGREDIENTS

Sun-cured Chopped Grass Hay (Timothy and Orchardgrass),
Sun-cured Chopped Alfalfa, Vegetable Oil.

GUARANTEED ANALYSIS
